## SUMMARY

Highly motivated and detail-oriented MERN Stack Web Developer with a recent certification from Interactive Cares. Leverages 4 years of experience in digital marketing to understand user needs and contribute to creating effective web solutions. Passionate about continuous learning and contributing to a collaborative team environment.

## EXPERIENCE

### EXECUTIVE - ONLINE MARKETING

**Search Fleek**, Purana Paltan, Dhaka, Bangladesh

2020 - 2023

- Managed website maintenance for diverse clientele at Search Fleek.
- Ensuring optimal functionality, timely updates, and seamless user experiences.
- Successfully executed content posting, on-page optimization, and general data entry tasks to enhance site performance and drive engagement.
- Collaborated directly with the Founder of Search Fleek, handling assigned tasks precisely and efficiently.

## DEVELOPER GROWTH

- Actively reinforcing core JavaScript concepts through daily problem-solving and mini-challenges.
- Continuously revising and deepening understanding of key MERN stack technologies including React.js, Node.js, Express, and MongoDB.
- Exploring advanced frontend tools such as Redux Toolkit and RTK Query for state management and API integration.
- Building and refining personal projects in progress (e.g., a blog application and a portfolio site) following modern development best practices.
- Practicing REST API development with Express and MongoDB, and integrating Firebase Authentication for secure user login systems.
- Applying Git and GitHub for version control and collaboration workflows.
